NV-3

Covid-19 Special edition.

Norvitae is a Norwegian Pharmaceutical company. We also provide PPE and selected medical equipment to help combat Covid-19.

Besides our own production we have carefully selected and verified certified products from reliable manufacturers.

Norvitae

Norvitae NV-3

3 Ply Surgical Mask

NV – Surgical Mask. This product category is often simply referred to as 'Face Mask', but Face Masks come in Consumer qualities or Medical Grade. Our Surgical Mask is Medical Grade.

Production Starting in Norway in July 2020.

DESCRIPTION: A surgical mask is intended to be worn by health professionals during healthcare procedures. It is designed to prevent infections in patients, and colleagues, by preventing bacteria and virus in liquid droplets and aerosols from the wearer's mouth and nose to spread. Despite high quality filter, the shape of the Surgical Masks is such that it first and foremost shall protect others against the wearer and not the wearer against others who are sick.

In the current time of Pandemic, the surgical mask is a vital tool in the fight to limit the spread of SARS-CoV-2. A number of countries now encourage or even enforce the use of a 'Face Mask' when in public areas. The Norvitae Surgical Mask will be the optimal choice for such.

NOTE! It is a disposable mask and not intended for reuse. Not because the mask itself loses its filtering capacity, but because the process of taking it on-and-off and the storage of the mask in between is likely to expose both the wearer and other individuals. This is why Norvitae advise to respect that the product is classified as 'Non Reusable'.

TECHNICAL SPECIFICATIONS OF MASK:

Our mask is designed and made to comply with EN 14683, Type II.

- Layer 1, (outer layer) is drop repellent nonwoven Polypropylene.
- Layer 2, is Meltblown Polypropylene (The filter).
- Layer 3, (inner layer) nonwoven soft breathable polypropylene.

Layer 1 is designed to be fluid resistant to splashes of blood and other infectious materials.

Layer 2 is where Norvitae chooses to use a higher quality Meltblown filter than many other manufacturers and superior to all 'consumer grade' face masks.

Layer 3 is made of soft nonwoven polypropylene that breaths and avoids moisture to form on the surface making it comfortable to wear for prolonged periods of time.

All Norvitae masks are made by Norvitae in Norway.

By end 3Q-2020 Norvitae will manufacture also the fabric for all 3 layers in Norway such that the core will be polypropylene made in Europe.

Norvitae will be in full control of the quality throughout all stages of production from the Meltblown filter material to the production and packing of mask.
